Sonance Mariner® Outdoor Speakers

The totally-redesigned Sonance Mariner® line of outdoor speakers brings together higher musical performance with more installation options than ever before. Featuring our exclusive new Fastmount® bracket system and a protected access connection terminal system, the eight models in the Mariner series feature tough, paintable sealed polypropylene enclosures and perforated aluminum grilles that enhance their weather resistance.

Features:

Family of 8 different models meets any outdoor entertainment need.

New Fastmount® bracket system increases placement options while making installation quicker and easier than ever:

- **Fastmount allows all Mariner speakers to pivot a full 180° on the bracket while remaining less than 1" from the mounting surface**
- **Click-stops on Fastmount pivots allow precise, repeatable speaker angle positioning.**
- **Fastmount allows all Mariner speakers to be horizontally mounted across a corner with no additional hardware, and will accommodate 2½" U-bolts (not included) for pole mounting.**
- **Push-and-lock speaker installation eliminates clumsy threaded knobs; locks are hidden behind grille for added security.**
- **The included base assembly allows the speaker to pivot in the direction parallel to the bracket.**

Protected access connection terminal system increases moisture resistance with grommetted rear wire entry port and protected front wire connector.

Mariner 62SS and Mariner 52SS models reproduce left & right stereo signals from a single speaker.

All models available in both black and white.

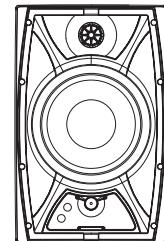

All models are compatible with Omnimount® 20.5-series mounting hardware.
